

PGY5 Schedule – Core Curriculum

1. Academic days will take place **every Thursday** starting at 8 am in the resident's room (times may be adjusted with the tutor for better convenience).
2. Resident **attendance must be marked for each lecture through Elentra**. Attendance rates below 70% may result in an “unsatisfactory” rating and will become part of your academic file and will be reviewed by the program director.
3. Lectures that are marked as resident-led will be presented by the resident with tutor guidance, otherwise tutors will be presenting all didactics. Residents are expected to divide the presentations equally amongst themselves.
4. Tutors can provide additional slides or summaries when appropriate when it serves the academic subject.
5. All residents attending the core curriculum lectures will be expected to have read the appropriate chapters written in the references. Chapters may overlap and get repeated due to the importance of subject. Electronic access will be provided to residents via the board website. The main reference is Kaplan and Sadock's synopsis, latest edition. Articles and other references will be provided in PDF documents.
6. On the day of lectures, you will be expected to complete a Tutor's Evaluation Form for each lecture.
7. If a resident is unable to present on their assigned day they must arrange a substitute with their colleague or discuss with their tutor to present on a different date. This must be flagged to the program director.
8. If a tutor is unable to present on their assigned day they must arrange a substitute with their colleagues or discuss with their residents to present on a different date. This must be flagged to the program director.
9. In case of academic day schedule change, it is expected that the residents will resume their work duty on that day.
10. Residents are asked to arrange their on-call schedules and duties. Avoid (if possible) night duty on Wednesdays for better preparation for academic day.
11. **Self-study protected time:** residents are highly encouraged to utilize this time to review practice MCQs in group study.
12. **Review Topics:** Supervising tutors must send residents a minimum of 5 MCQ Royal College Level exam questions *a week before the review date related to the review topic*. Residents are expected to answer the questions as part of their exam preparation providing rationales/ discussion during the review with their tutor.. Residents are encouraged to go through past review lectures and focus their review on guidelines and practice questions.

13. **OSCE:** Residents will practice doing OSCE's with preceptors on designated topics in the first half of the year. In the second half, the topics will be blinded to simulate exam conditions.
14. **Journal Club:** Each resident will take a turn to review and orally present the chosen article for discussion at journal club. Other residents will be expected to have read the chosen article beforehand. Journal Club will be supervised by senior residents (PGY5).
15. **Clinical Crossroads:**
An interdisciplinary collaboration between psychiatry and other programs with the aim of sharing knowledge and perspectives on topics commonly crossing both disciplines. Residents from each program will prepare a 20 min presentation on the topic (total 40 mins from both) and present to each other on zoom. A supervisor will be present from each discipline to facilitate a 20 mins discussion at the end. PGY3 residents are expected collaboratively on the presentation; colleagues will support the presenting resident with literature review on latest evidence.
The seminar will be held on the **last Thursday of every month.**
16. **PGY5 Lectures will be held in the Hall 18 when not in conjunction with others.**

Core Curriculum PGY5 lectures

Topic	Time	Presenters	Training Requirement	References
