

Consultation Liaison Psychiatry:

The objective of this rotation is for residents to master providing psychiatric consultations to medical and surgical patients in general hospitals.

This rotation takes place for a month in PGY1 and for 4 months in PGY4. Currently only offered at Amiri and Mubarak AlKabeer hospitals.

Program and MOH Expectations/Requirments:

Successful completion of the rotation with an end of rotation of 3 and above and a minimum of 75% attendance.

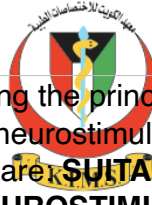

Expected CANMEDS Milestones:

1. **ME** - Conduct and organize an appropriate psychiatric assessment of medical/surgical patients including attention to barriers to communication, and integration of assessment into the medical episode of care.
2. **ME** - Integrate medical /surgical characteristics and knowledge of a case into the bio-psycho-social understanding and management of medical/surgical patients. Demonstrate an approach to diagnostic ambiguity and complexity, which includes a robust differential diagnosis and rationale for leading working diagnosis
3. **ME, COM** - Utilize psychotherapeutic principles to help patients with their adaptation to illness and treatment, and psychotherapy skills to traverse barriers to care. Where appropriate, engage in motivational interviewing, supportive psychotherapy, and mindfulness/cognitive behavioral skills.
4. **ME** - Assess suitability for, and prescribes appropriate psychopharmacological treatment in the context of medical/surgical illness. Demonstrate capacity to tailor psychopharmacology to medical/surgical patients.
5. **ME** - Demonstrate proficient knowledge of delirium, psychiatric illness secondary to medical/surgical illness, and end of life care. Demonstrate working knowledge of somatoform disorders. Demonstrate an appreciation of normal and abnormal psychological adaptation to physical illness including the influence of personality and attachment style.
6. **ME** - Demonstrate knowledge and skills in diagnosing and treating substance use disorders and their sequelae (intoxication, withdrawal, harm reduction, contribution to delirium/Wernicke's encephalopathy, etc.) in medical/surgical circumstances.
7. **ME, COM** - Listen effectively to the medical/surgical patient and their family members and other important sources for collateral, evidenced by nuanced patient narrative integrated into HPI. Use language appropriate to the patient's educational level, culture, etc.
8. **COL** - Take responsibility as a consultant to learn about how they can be most helpful in their consultation to the primary medical team, including engaging with the primary team as well as other consulting services involved.
9. **COL** - Work effectively with other health care team members, including non-psychiatric MDs, RNs, MSWs, PAs, Psychologists, and Spiritual Care staff, recognizing their roles and responsibilities. Contribute effectively to the interdisciplinary management of the medical/surgical patient to best serve the patient's needs.
10. **COL, P** - Demonstrate a willingness to receive and reflect upon constructive feedback from colleagues, other health care workers and patients and their families, including observed integration of feedback.
